

LAUNCH OF EVASMARTCYLINDER

EVASMARTPROGRAM

**WE'RE NOT JUST PRODUCING THE CYLINDER OF FUTURE,
WE'RE CREATING THE FUTURE OF CYLINDER.**

EvaSmartProgram uses imagination together with technology.
We produce smart cylinders in connection with your needs and
allow data management with a sustainable approach.

WHAT FEATURES DO YOU NEED?

EvaSmartProgram understands your needs by finding tailor-made solutions with unique features. That empowers you to have suitable products based on customer expectations and market realities.

Data Management

Design

SAFETY FIRST AS ALWAYS!

SAFETY AND CONVENIENCE

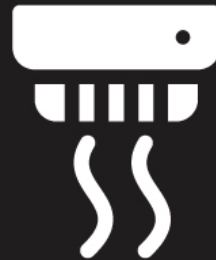

In EvaSmartProgram safety and convenience comes first.
For this reason, your cylinders warn you in case of gas leakage.
It shows you the amount of gas in the moment you want.

LEVEL INDICATOR LEDS

With the level indicating leds, your customers can have the opportunity to view the gas levels in the cylinder at any time.

GAS LEAKAGE DETECTOR

In case of any gas leakage, it warns the customer in advance and maximizes customer safety. You can differentiate your service and product by providing a safer product to your customers.

ERGONOMIC DESIGN

Together with the design tailored to your needs, the most suitable models for human ergonomics are developed for the transport & storage processes and convenient customer-use.

CYLINDERS IN CONTACT: **CONNECTION**

EvaSmartProgram produces cylinders in connection with your needs. Thus, we offer you great convenience in logistics and ordering by creating loyal customers at the same time.

Asset Management

You can keep track of where your cylinders are, minimizing losses. In this way, you can evaluate your cylinder stocks in the most efficient and effective way.

Logistics Optimization

Know in advance how much gas is left in the cylinder before customer order, you can optimize the logistics of your delivery.

Bluetooth Connection & Easy Ordering

With Bluetooth technology, your customers can connect their cylinder to mobile applications.

Low Level Warning

They can observe the levels of the cylinder from their mobile phones, and they can avoid problems such as being gasless by organizing their orders before the cylinders run out.

BUILD CUSTOMER RELATIONSHIP

ALL YOU NEED FOR DATA MANAGEMENT: HARDWARE AND SOFTWARE SOLUTIONS

At EvaSmartProgram we know how important it is for an energy company to know customers well. For this reason, we aim to provide you with all the hardware products and also software services so that you get all the data about your customers.

CUSTOMER CONNECTED & CUSTOMER LOYALTY

By connecting with your end-user customers and their cylinders, you can follow the usage trends and usage habits of your customers; thus, you can offer tailormade marketing solutions and develop applications that will create customer loyalty.

DATA COLLECTION

You can be close to your customer, have their knowledge, minimize customer losses and develop customer-specific solutions.
